

## Manual Testing Bugs for React Native Application

### Bugs:

1- Your Cart Menu allows the user to make the quantity negative.

#### Steps to Reproduce:

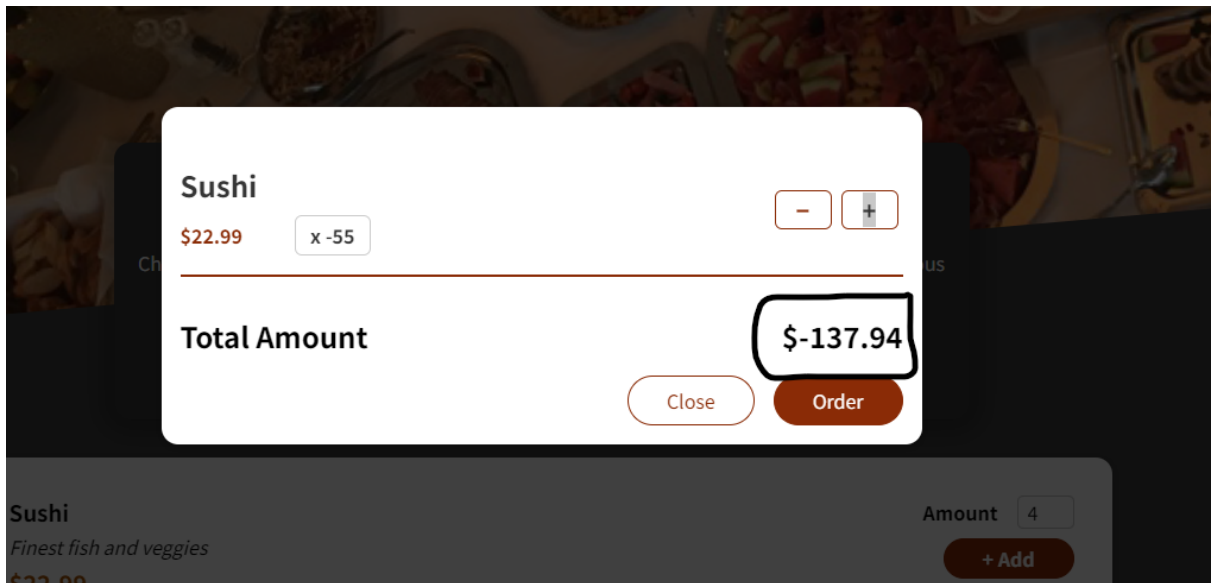

- Navigate to the website.
- Add any dish to your cart multiple times.
- Click on your cart button.
- Click on the Negative Button “-” on the Your Cart Menu unless the quantity becomes negative.
- Then, you will notice that UI is allowing you to make the quantity negative.

2- Your Cart Menu allows the user to make the Price negative.

#### Steps to Reproduce:

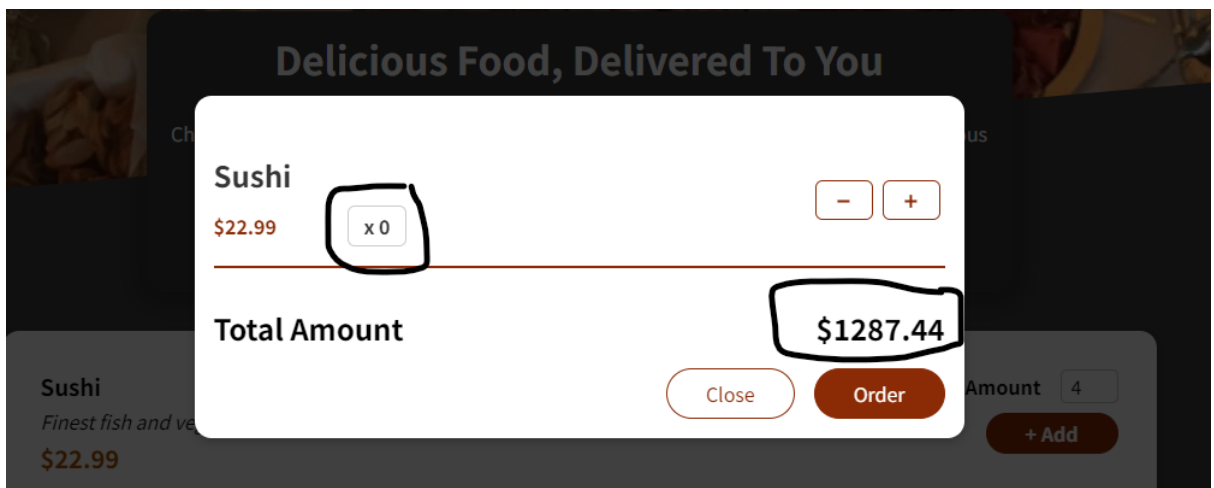

- Navigate to the website.
- Add any dish to your cart multiple times.
- Click on your cart button.
- Click on the Negative Button “-” on the Your Cart Menu unless the quantity becomes negative.
- Then, you will notice that UI is allowing you to make the price negative.

3- Your Cart Menu still shows the price when the quantity becomes zero.

**Steps to Reproduce:**

- Navigate to the website.
- Add any dish to your cart multiple times.
- Click on your cart button.
- Click on the Negative Button “-” on the Your Cart Menu unless the quantity becomes negative.
- Then click the Positive Button “+” on the Your Cart Menu unless the quantity becomes zero.
- Then, you will notice that UI is still showing the price.

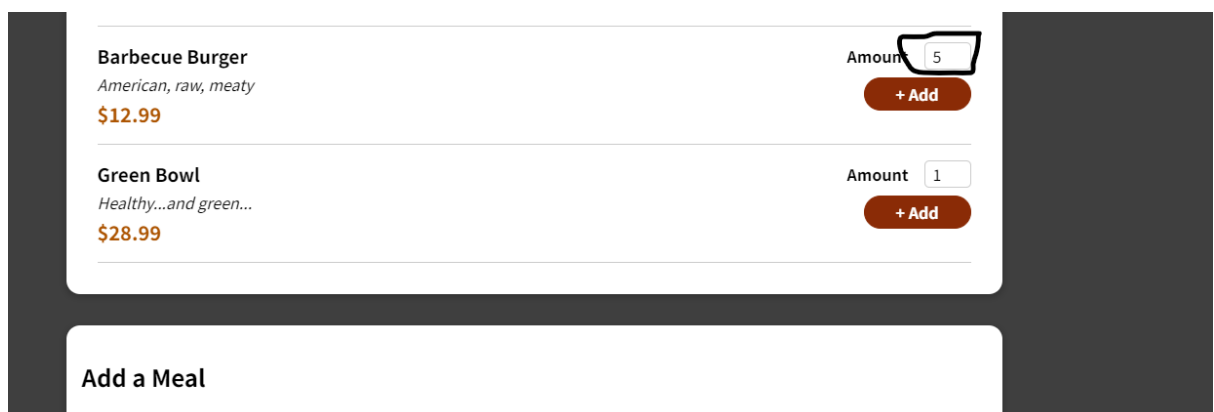

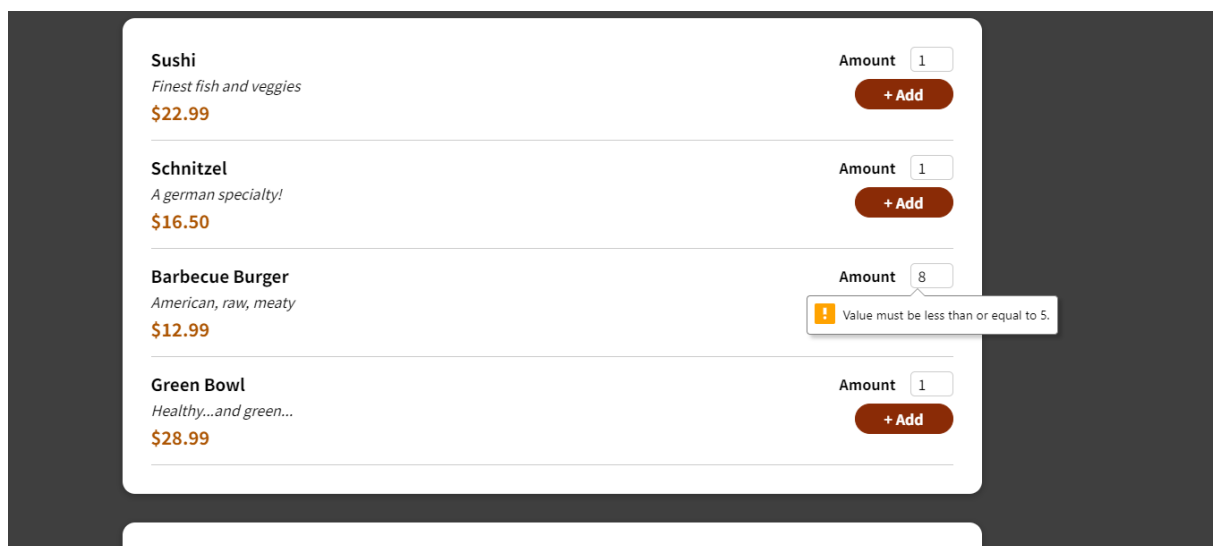

4- UI does not allow the user to add more than 5 amounts when trying from outside the Cart Menu.

**Steps to Reproduce:**

- Navigate to the website.
- Hover over the amount field in front of the dish
- Now you will see upward and downward arrows.
- Click on the upward arrow until the amount becomes 5.
- Then try to add more amounts, the UI will not allow you to add more amounts.

**Note:** UI allows users to add unlimited quantities when trying from the 'Your Cart' Menu. Furthermore, if trying to add manually by putting a number from the keyboard, UI is showing alert "Value must be less than or equal to 5."

5- The Order Button is not working in the “Your Cart” menu.

**Steps to Reproduce:**

- Navigate to the website.
- Add any dish to your cart.
- Click on your cart button.
- Click on the “Order” button.
- UI will not respond.

6- UI alignment needs to be fixed in the “Add a Meal” Section.

**Steps to Reproduce:**

- Navigate to the website.
- In the “Add a Meal” section name, the Description and Price needs to be aligned, and their text boxes also need to be aligned in the same manner.

The screenshot shows a web form titled "Add a Meal". It contains three input fields: "Name:", "Description:", and "Price:". The "Name:" field has a red error message "Please enter a valid name." below it. The "Description:" field is empty. The "Price:" field has a red error message "Please enter a valid price (at least 0.01)." below it. An "Add Meal" button is at the bottom. The form is flanked by dark vertical bars. The text and input boxes are not aligned to the right.

7- The description box should have a dialogue box instead of a text box.

**Steps to Reproduce:**

- Navigate to the website.
- In the “Add a Meal” section, the Description box should have a dialogue box instead of a text box.

This screenshot is identical to the previous one, showing the "Add a Meal" form. However, the "Description:" input field is now circled with a thick black hand-drawn line, indicating it is the target for replacement with a dialogue box. The form is flanked by dark vertical bars.

## 8- Mandatory Fields label must have a steric.

### Steps to Reproduce:

- Navigate to the website.
- In the “Add a Meal” section, Name and Price are mandatory fields.
- But they don't contain steric to show that these fields are mandatory.

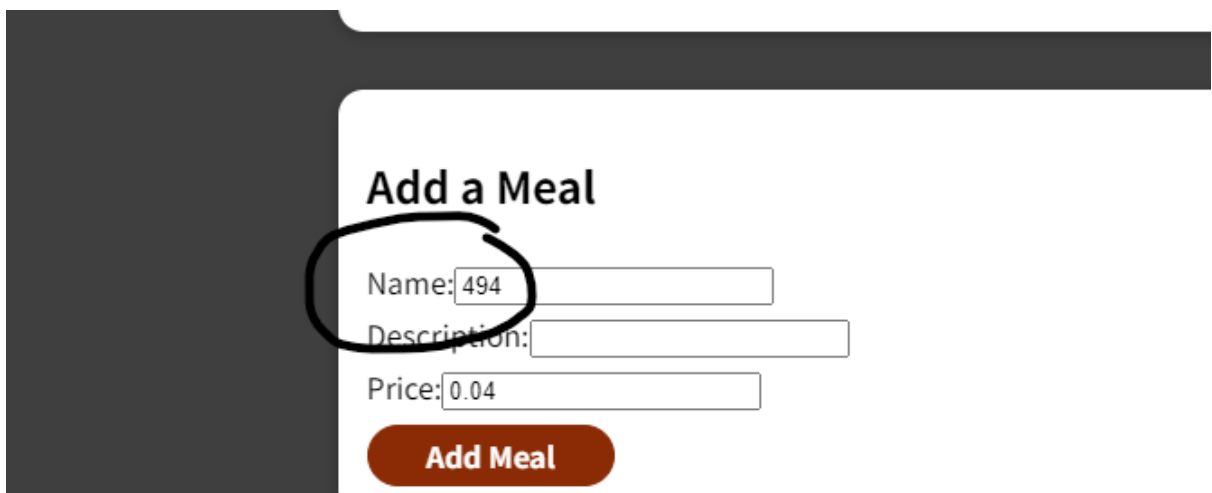

The screenshot shows a web form titled "Add a Meal". It contains three input fields: "Name:", "Description:", and "Price:". The "Name:" field has a red error message below it: "Please enter a valid name." The "Price:" field has a red error message below it: "Please enter a valid price (at least 0.01)". There is a brown "Add Meal" button at the bottom of the form.

## 9- The name field is taking numbers and characters as input.

### Steps to Reproduce:

- Navigate to the website.
- In the “Add a Meal” section, In the Name field, try to add any number of characters.
- The UI will allow the user to fill in the number and characters in the name field instead of throwing an error that only alphabets are allowed.

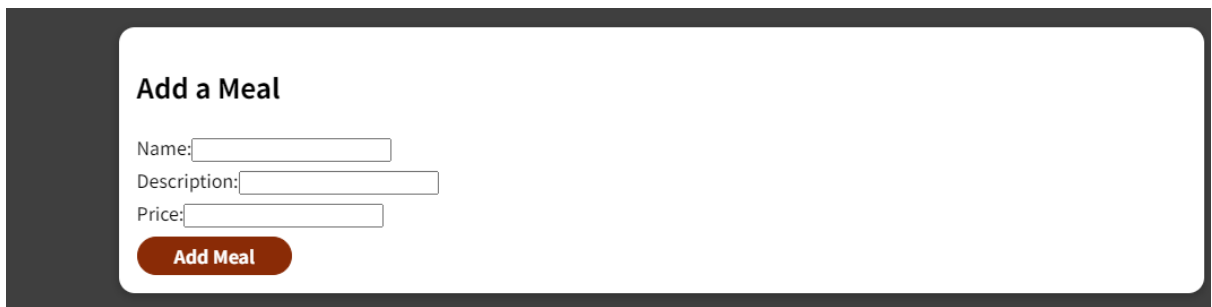

The screenshot shows the "Add a Meal" form. The "Name:" field is circled in black and contains the number "494". The "Description:" field is empty. The "Price:" field contains the number "0.04". There is a brown "Add Meal" button at the bottom of the form.

## 10- Instructions disappear after adding one meal from “Add a Meal” section.

### Steps to Reproduce:

- Navigate to the website.
- There will be instructions under name and price text boxes.
- Add one meal by putting name, price, and description.

- Then, you will notice that instructions will disappear from the page.

**Add a Meal**

Name:

Description:

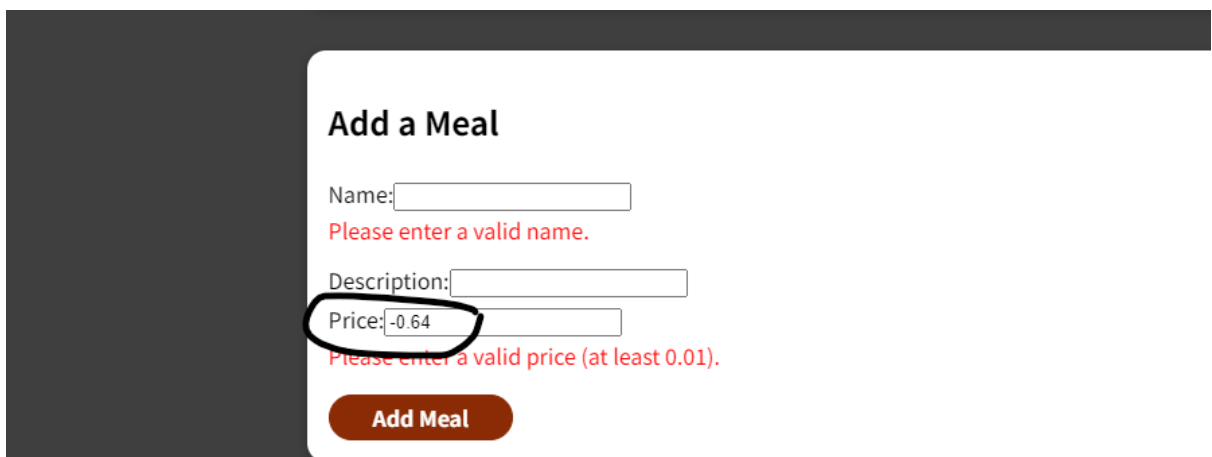

Price:

**Add Meal**

## 11- Price in negative value.

### Steps to Reproduce:

- Navigate to the website.
- In the “Add a Meal” meal section, try to add a negative price.
- Though Meal will not be added, UI should restrict the user to add negative prices.

**Add a Meal**

Name:   
Please enter a valid name.

Description:

Price:   
Please enter a valid price (at least 0.01).

**Add Meal**

## Improvements:

- There should be an editing option for the added meals.
- UI should be interactive.
- Web App should be Responsiveness.
